Minor peaks are typical synthesis-related by-products and are included in the purity calculation.

QUALITY YOU CAN TRUST

We partner with independent UK laboratories to ensure the highest standards of quality and accuracy.

ADVANCED ANALYTICAL TESTING

Utilizing HPLC, LC-MS & other industry-leading methods for precise purity and identity confirmation.

TRANSPARENCY FIRST

QR-verifiable certificates and detailed reports provide complete transparency for every tested batch.

GLOBAL STANDARD

Our quality systems are aligned with international research and manufacturing best practices.
